

MBDA

A STRATEGIC EUROPEAN PARTNER

MBDA

Example of European Cooperation: LynkEUs project

MBDA

Dynamic demonstrations

BLOS Firing

Two AKERON MP missiles firing done from an IMPACT turret integrated onto a SHERPA vehicle, engaging a target designated by a micro unmanned aerial vehicle (UAV). It is the first time that a BLOS firing has been performed from a vehicle.

Consolidation of the European Cooperation around BLOS : MARSEUS

- 4 Members States: France, Belgium, Cyprus, Sweden

Project Modular Architecture Solution for EU States (MARSEUS) aims to study and develop architecture components and functions related to a BLOS Extended Range and a BLOS Extended Capacity capabilities, as well as considering new functionalities related to collaborative combat and training aspects.

- Consortium of 22 companies, universities, Labs and Research centers, in 11 European countries

Cooperation in Greece

Project 1 – Joint development of LYNKEUS MISSILE LAUNCHING SYSTEM (LMLS) for light turrets with MILTECH

- Develop a **LYNKEUS Modular Launching System (LMLS)** to be integrated on **light turrets** already in service or on new turrets
- Launch this capability in two versions to address the whole market’s needs

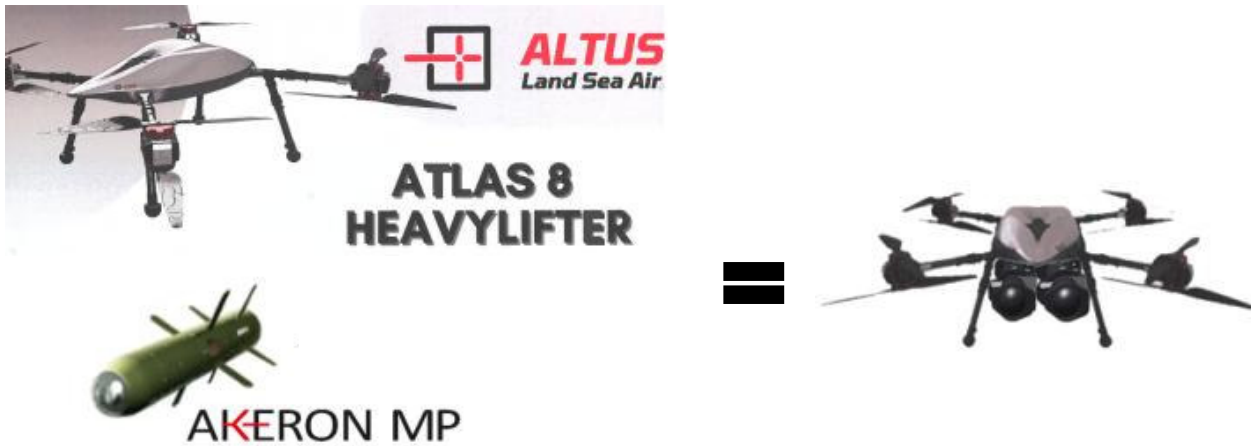

- MILTECH is the Greek company selected by MBDA to be its long-term partner on this project

Cooperation in Greece

- Integrate two AKERON MP missiles on UAV ATLAS 8 Heavyliifter

Demo of Atlas 8 at NAMFI in Chania

- ALTUS is the Greek company selected by MBDA to be its long-term partner on this project
